OBJECTIVES

201. COMMUNITY DEVELOPMENT OBJECTIVES

The following community development objectives developed through the Township's comprehensive planning process and set forth explicitly and implicitly in the Township's Comprehensive Plan as adopted by the Board of Township Supervisors, and as amended by the Board from time to time, are the basis for the provisions of this Ordinance.

201.1. To protect and promote the public health, safety, and the general welfare of the residents of the Township.

201.2. To protect good farming areas from excessive development and from development that hurts agricultural interests.

201.3. To insure that all development takes place on lots of adequate size so that on-lot sewage systems will be workable and not cause land pollution problems harmful to nearby residents and to the environment in general.

201.4. To insure that higher density residential development is located in areas that can be served by community facilities, particularly community sewerage systems.

201.5. To guide development into locations and patterns which will work to protect property values and prevent incompatible development which would have the effect of undermining such values.

201.6. To increase the tax base of the Township by providing suitable lands for the location of commercial and industrial uses, preventing such lands from being compromised by inadvisable development not in keeping with their highest and best use potential.

201.7. To encourage business and industry to locate in areas already established as logical areas of development and settlement which are conveniently accessible to the population and which can be economically served by Township facilities.

201.8. To protect the headwaters, aquifer recharge areas and environmentally sensitive areas adjacent to Canadohta Lake by regulating the density and type of development that can locate on these lands.

201.9. To link Lincolnville and the Canadohta Lake area in one development network so that the two areas can share their assets to become one united community serving all of the Township.

201.10. To protect the existing main highway system of the Township from indiscriminately placed access points and from poorly sited structures along the rights-of-way, insuring that these highways can continue to carry traffic safely and effectively.

201.11. To encourage additional housing of all types and cost ranges without jeopardizing established property values.

201.12. To preserve to the fullest extent possible the Township's natural amenities including its streams, springs, lakes, wetlands and woodlands.

201.13. To identify areas subject to periodic flooding and to protect such areas from future permanent building.

201.14. To allow citizens maximum opportunities to develop their land consistent with the objectives of this Ordinance.

Any existing trees or vegetation which are to be preserved should be identified relative to their location. ARTICLE XIII

CONDITIONAL USES AND USES BY SPECIAL EXCEPTION

1301. PURPOSE

Conditional Uses and Uses by Special Exception are unique and their effect on the surrounding environment cannot be determined in advance of the use being proposed for a particular location. At the time of application, a review of the location, design, configuration and potential impact of the proposed use shall be conducted by the Planning Commission by comparing the use to established development standards and design guidelines. This review shall determine whether the proposed Conditional Use or Use by Special Exception addresses the specific standards identified in this Article and whether it should be permitted, by weighing the public need for, and the benefit to be derived from the use against the impact which it may cause.

1302. PROCEDURE FOR CONDITIONAL USE APPROVAL

1302.1. Approval of Conditional Use: The Board of Township Supervisors shall hear and decide requests for Conditional Uses pursuant to review and recommendation by the Planning Commission; however, they shall not approve a Conditional Use application unless and until:

A. A written application for Conditional Use approval is submitted to the Zoning Officer no less than ten (10) working days prior to the regular meeting of the Planning Commission. The application shall indicate the Section of this Ordinance under which Conditional Use approval is sought and shall state the grounds upon which it is requested. 1302.3. A public hearing is conducted by the Board of Township Supervisors pursuant to public notice.

1302.4. The Township Supervisors shall hear and decide requests for Conditional Uses within sixty (60) days from the date of receipt of a complete and properly filed application.

1302.5. In considering an application for Conditional Use approval, the Board of Township Supervisors may prescribe appropriate conditions and safeguards in conformity with the spirit and intent of this Article. A violation of such conditions and safeguards, when made a part of the terms and conditions under which Conditional Use approval is granted, shall be deemed a violation of this Ordinance and shall be subject to the enforcement provisions of Article XIX of this Ordinance.

If land development approval is required for the Conditional Use, the application for Conditional Use approval and the application for approval of a land development required by the Township Subdivision and Land Development Ordinance may be processed concurrently provided all application requirements of both Ordinances for a Conditional Use and a land development plan are met.

1303. EXPIRATION OF CONDITIONAL USE APPROVAL

Conditional use approval shall expire automatically, without written notice to the applicant, if no application for a land development plan, a grading permit, a building permit or an occupancy permit to undertake the construction or authorize the occupancy described in the application for Conditional Use approval is submitted within twelve (12) months of said approval, unless the Board of Township Supervisors, in its sole discretion, extends Conditional Use approval upon written request of the applicant received prior to its expiration. The maximum extension permitted shall be one (1) twelve-month extension.

H. All outside storage shall be screened from public view from streets and adjoining properties by a six foot (6') hedge or opaque fence.

I. The proposed use shall have direct access to a public street with sufficient capacity to accommodate the traffic generated by the proposed use.

1307.9. Communications Towers: The following regulations shall apply to all transmission facilities proposed for placement in the I Industrial District.

A. Lot Size: The lot size dimensions (depth and width) shall be dictated by the fall radius of the tower. The minimum dimensions shall be the radius of the height of the tower in each direction. (Example - 200' high tower would be required to have a 400' diameter parcel).

B. The communications company is required to demonstrate, using technological evidence, that the antenna must go where it is proposed, in order to satisfy its function in the company's grid system.

C. If the communications company proposes to build a tower (as opposed to mounting the antenna on an existing structure), it is required to demonstrate that it contacted the owners of tall structures within a one-quarter (1/4) mile radius of the site proposed, asked for permission to install the antenna on those structures, and was denied for reasons other than economic ones. This would include smoke stacks, water towers, tall buildings, antenna support structures of other communications companies, other communications towers (fire, police, etc.), and other tall structures. Bloomfield Township may deny the application to construct a new tower if the applicant has not made a good faith effort to mount the antenna on an existing structure. One or more of the following reasons for not selecting such structures must apply:

1. The proposed antenna and related equipment would exceed the structural capacity of the existing structure and its reinforcement cannot be accomplished at a reasonable cost.
2. The proposed antennas and related equipment would cause radio frequency interference with other existing equipment for that existing structure and the interference cannot be prevented at a reasonable cost.
3. Such existing structures do not have adequate location, space, access or height to accommodate the proposed equipment or to allow it to perform its intended function.
4. Addition of the proposed antennas and related equipment would result in electromagnetic radiation from such structure exceeding applicable standards established by the Federal Communication Commission governing human exposure to electromagnetic radiation.

D. The applicant shall demonstrate that the antenna is the minimum height required to function satisfactorily. No antenna that is taller than this minimum height shall be approved. In addition, no antenna shall exceed two hundred feet (200') in height.

E. All communications towers must be stealth towers, where possible. A stealth tower is a Communications Tower which is not recognizable as a conventional Communications Tower (e.g. a metal lattice structure), but instead is disguised or concealed in such a fashion as to conform to its surroundings. Examples of such stealth towers include a tower which looks like a tree or a clock tower, or one which is concealed in a church steeple or concrete silo. All towers shall be of a monopole design unless the Planning Commission deems that an alternate design is necessary or preferred due to topography or to better blend with existing structures, for safety reasons, or if necessary to allow for co-location. Towers are required to attempt to be camouflaged to simulate a natural feature, such as a tree, or other camouflaged design, such as a flagpole, thereby reducing the aesthetic impact to the surrounding area.

1. The Planning Commission may at its discretion, require visual impact demonstrations including mock-ups and/or photo montages; screening and painting plans; network maps, alternate site analysis; lists of other nearby telecommunications facilities; or facility design alternatives for the proposed tower.

2. The Zoning Officer is authorized to employ on behalf of the Township, an independent technical expert to review technical materials submitted by the applicant or to prepare any technical materials required but not submitted by the applicant. The applicant shall pay the costs of said review and/or independent analysis.

F. The Township Supervisors may waive the stealth tower requirement where the applicant can demonstrate that the requirement is not necessary to protect the health, safety and welfare, considering items such as impact on surrounding and abutting property values; height; screening; number of uses per tower, including public uses; location; and actual setbacks.

G. Setbacks from base of antenna support structure: If a new antenna support structure is constructed (as opposed to mounting the antenna on an existing structure), the minimum distance between the base of the support structure or any guy wire anchors and any property line shall be the largest of the following:

1. One hundred percent (100%) of antenna height.
2. The minimum setback in the underlying zoning district.
3. Fifty feet (50') minimum.

H. Fencing: A fence shall be required around the antenna support structure and other equipment, unless the antenna is mounted on an existing structure. The fence shall be a minimum of eight feet (8') in height with three strands of barbed wire at the top with a locked gate.

1. All guy wires associated with guyed communications towers shall be clearly marked so as to be visible at all times and shall be located within a fenced enclosure.
2. All towers shall be reasonably protected against unauthorized climbing. The bottom of the tower from ground level to twelve (12) feet above ground shall be designed in a manner to preclude unauthorized climbing.

I. Landscaping: The following landscaping shall be required to screen as much of the support structure as possible, the fence surrounding the support structure, and any other ground level features (such as a building), and in general soften the appearance of the cell site. Bloomfield Township may permit any combination of existing vegetation, topography, walls, decorative fences or other features instead of landscaping, if they achieve the same degree of screening as the required landscaping. If the antenna is mounted on an existing structure, and other equipment is housed inside an existing structure, landscaping shall not be required.

1. An evergreen screen shall be required to surround the site. The screen can be either a hedge (planted three feet [3'] on center maximum) or a row of evergreen trees (planted ten feet [10'] on center maximum). The evergreen screen shall be a minimum height of six feet (6') at planting, and shall grow to a minimum of fifteen feet (15') at maturity.

2. In addition, existing vegetation on and around the site shall be preserved to the greatest extent possible.

J. In order to reduce the number of antenna support structures needed in the community in the future, the proposed support structure shall be required to accommodate other users, including other communications companies, and local police, fire, ambulance services and municipal authority and road departments. In addition, a linear two (2) mile separation shall be maintained between communications towers, measured from the base of the support structure.

K. The communications company must demonstrate that it is licensed by the Federal Communications Commission to operate a communications tower, if applicable, and communication antennas. The applicant shall submit certification from a Pennsylvania-registered professional engineer that a proposed communications tower will be designed and constructed in accordance with current structural standards for Steel Antenna Towers and Antenna Supporting Structures, published by the Electrical Industrial Association/Telecommunications Industry Association and applicable requirements of the Township's Building Code.

L. Antenna support structure under two hundred feet (200') in height should be painted silver or have a galvanized finish retained, in order to reduce the visual impact. Support structures may be painted green up to the height of nearby trees. Support structures near airports, shall meet all Pennsylvania Department of Transportation, Bureau of Aviation and Federal Aviation Administration regulations. No antenna support structure may be artificially lighted except as provided for and required by the Pennsylvania Department of Transportation, Bureau of Aviation and FAA.

- a. No advertising message nor identification, signs or lights shall be mounted on a communications tower, except as may be required by the Federal Communications Commission, Federal Aviation Administration or other governmental agency that has jurisdiction.

M. A land development plan shall be required for all cell sites, showing the antenna, antenna support structure, building, fencing, buffering, access to public rights-of-way, and all other items required in the Bloomfield Township Subdivision and Land Development Ordinance. The site plan shall not be required if the antenna is to be mounted on an existing structure.

- a. Construction of the tower, accessory buildings, landscaping requirements must be completed within one year of the issuance of the permit.

N. If a communications tower remains unused for a period of 12 consecutive months, the owner or operator shall dismantle and remove the communications tower unless a written exemption is granted by the Zoning Administrator. In the event that unused communication equipment is not removed by the owner, the tower and associated facilities may be removed by the Township and the costs of removal assessed against the property.

O. In granting the use, the Supervisors may attach reasonable conditions warranted to protect the public health, safety and welfare, including, but not limited to, location, fencing, screening, increased setbacks and the right to use said facilities for public purposes.

P. All approvals will be only for specific facilities set forth in the application. No additions or alterations thereto will be permitted without a new application.

Q. Prohibited Uses of Communication Towers:

a. No tower or accessory structure shall be erected in any public or private drainage easement.

b. No temporary mobile sites are permitted except in the case of equipment failure, equipment testing, or in the case of an emergency situation as authorized by the Township Zoning Officer. Use of temporary mobile cell sites for testing purposes shall be limited to twenty-four (24) hours; use of temporary mobile cell sites for equipment failure or in the case of the emergency situation shall be limited to a term of thirty (30) days. These terms may be extended by the Zoning Officer.

c. Permanent platforms or structures, exclusive of antennas, other than those necessary for safety purposes or for tower maintenance are prohibited.

Uses of the same general character as any of the uses authorized as permitted uses by right, conditional uses or uses by special exception in the Zoning District in which the property is located shall be allowed, if the Zoning Hearing Board determines that the impact of the proposed use on the environment and adjacent streets and properties is equal to or less than any use specifically listed in the Zoning District. In making such determination, the Board shall consider the following characteristics of the proposed use:

1. The number of employees;
2. The floor area of the building or gross area of the lot devoted to the proposed use;

1606.3. A nonconforming use may be changed to another nonconforming use after a hearing by the Zoning Hearing Board. In considering such an action, the Zoning Hearing Board shall determine that the proposed use is equally appropriate or more appropriate to the district than the existing nonconforming use.

1805.2. If, by reason of absence or disqualification of a member, a quorum is not reached, the Chair of the Board shall designate as many alternate members of the Board to sit on the Board as may be needed to provide a quorum. Any alternate member of the Board shall continue to serve on the Board in all proceedings involving the matter or case. Designation of an alternate pursuant to this Section shall be made on a case-by-case basis in rotation according to declining seniority among all alternatives.

The Board shall keep full public records of its business, which records shall be the property of the Township, and shall submit a report of its activities to the Board of Supervisors, as requested by the Supervisors.

1806. FUNCTIONS OF ZONING HEARING BOARD

1806.1. The Board shall hear and decide appeals where it is alleged there is error in any order, requirement or determination made by the Zoning Officer in the administration of the Ordinance.

The Board shall hear challenges to the validity of the Zoning Ordinance and/or map and any parts thereof; except it may not hear challenges pertaining to the process of enactment or adoption of the Ordinance and map. At the conclusion of the hearing the Board shall decide all contested questions and shall make findings on all relevant issues of fact which shall become part of the record on appeal to the Court.

1806.3. The Board shall hear requests for variances where it is alleged that the provisions of the Zoning Ordinance, strictly applied, inflict unnecessary hardship upon the applicant; public notice shall be given for such hearings. The Board may issue a variance to any requirements of this Ordinance wherein strict enforcement would result in practical difficulty or unnecessary hardship

which would deprive the applicant of a reasonable use of his land or building. A variance may be granted provided the following findings are made by the Board:

- A. That there are unique physical circumstances or conditions, including irregularity, narrowness, or shallowness of lot size and shape, or exceptional topographic or other physical conditions peculiar to the property and that the unnecessary hardship is due to these conditions generally created by the provisions of the Zoning Ordinance;
- B. That because of such physical circumstances there is no possibility that the property can be developed in strict conformity with the provisions of this Ordinance;
- C. That such unnecessary hardship has not been created by the applicant;
- D. That the variance, if authorized, will not alter the essential character of the neighborhood in which the property is located, nor substantially or permanently impair the appropriate use of adjacent property nor be detrimental to the public welfare; or
- E. That the variance, if authorized, will represent the minimum variance that will afford relief and will represent the least modification possible of the regulation in issue.

1806.4. Furthermore in considering requests for variances, the following principles shall apply:

- A. Nonconforming uses of neighboring lands, or certain types of structures in the same district and permitted or nonconforming uses of land or structures in other districts shall not be considered grounds for the issuance of variances.
- B. The Board shall not permit variances which allow a use not permissible under the terms of this Ordinance in the district involved unless the Board finds that the applicant cannot make a reasonable use of his land.
- C. In granting any variance, the Board may attach such reasonable conditions and safeguards as it may deem necessary to implement the purpose of this Ordinance. Violation of such conditions and safeguards, when made a part of the terms under which the variance is granted, shall be considered a violation of this Ordinance and punishable under Section 2004

1806.5. The Board shall approve Uses by Special Exception for any of the uses identified as such under the terms of this Ordinance. Application for a use by special exception may be subject to additional, more specific standards and criteria as established in other section of this Ordinance.

1806.6. Where the Board has jurisdiction over matters pursuant to the above subsections, the Board shall also hear all appeals which an applicant may elect to bring before it with respect to any other municipal ordinance or requirement pertaining to the same development. In any such case, the Board shall have no power to pass upon nonzoning issues but shall take evidence and make a record thereon as provided in this Ordinance. At the conclusion of the hearing, the Board shall make findings on all relevant issues of fact which shall become part of the record on appeal to court.

1807. ZONING HEARING BOARD PROCEDURES

The hearing procedure of the Zoning Hearing Board shall be governed by the provisions of the Pennsylvania Municipalities Planning Code (Act 247) of 1968, as amended, and such rules, not inconsistent therewith, as the Board may adopt. The Board shall conduct the hearings and make decisions in accordance with the following requirements.

1807.1. Any appeal for a variance from the strict requirements of the Zoning Ordinance or an appeal from an order, determination or interpretation of the Zoning Officer shall be taken by filing a notice of appeal with the Zoning Officer, who shall transmit immediately said notice of appeal to the Zoning Hearing Board. The Zoning Officer shall transmit to the Board all of the documentary material constituting the record upon which the action for appeal was taken.

1807.2. The appellant shall, at the time of filing his appeal, pay the Zoning Officer a fee as determined by the Township Supervisors to defray or help defray the cost of the appeal, including advertising.

1807.3. Each appeal shall be tried on its merits at a public hearing. Public notice of such appeal shall be given. The Board also shall give notice to the applicant, the Zoning Officer and such other persons as the Township Supervisors may designate by Ordinance. Notices shall be given at such time and in such manner as shall be prescribed by Ordinance, or, in the absence of Ordinance provisions, by rules of the Board. The Board may adjourn any hearing for the purpose of giving further notice.

1807.4. The Planning Commission shall furnish all pertinent narrative material, maps, charts and other data relative to the problem for reference by all concerned. The Board may adjourn any hearing for the purpose of reviewing such data as may be pertinent to the problem and request interpretations of said data by a representative of the Planning Commission.

1807.5. The Chairman of the Board shall have the power to administer oaths and issue subpoenas to compel the attendance of witnesses and the production of relevant documents and papers.

1807.6. The parties shall have the right to be represented by counsel and shall be afforded the opportunity to respond and present evidence and argument and cross-examine adverse witnesses on all relevant issues.

1807.7. The Board shall keep a stenographic record of the proceedings and a transcript of the proceedings, and copies of graphic or written material received in evidence shall be made available to any party at cost.

1807.8. The Board shall hold the required hearing within sixty (60) days from the date of the applicant's request for the hearing. The Board shall render a written decision or, when no decision is called for, make written findings on the application within forty-five (45) days after the last hearing before the Board. Each decision shall be accompanied by findings of fact and conclusions based thereon together with the reasons therefore.

1807.9. Where the Board fails to hold the required hearing within the time limit required and/or where the Board fails to render a decision within the time period required, the decision shall be deemed to have been rendered in favor of the applicant unless the applicant has agreed in writing to an extension of time.

1807.10. A copy of the final decision or, where no decision is called for, of the findings shall be delivered to the applicant personally or mailed not later than one (1) day following the date of the decision. To all other persons who have filed their name and address with the Board not later than the last day of the hearing, the Board shall provide by mail or otherwise brief notice of the decision or findings and a statement of the place at which the full decision or findings may be examined.

1807.11. No person shall be allowed to file any proceeding with the Board later than thirty (30) days after any application for development has been approved by an appropriate municipal official, agency, or body if such procedure is designed to secure the reversal or to limit the approval in any manner unless such person alleges and proves that they had no notice, knowledge, or reason to believe that such approval had been given.

1808. MEDIATION OPTION

1808.1. Parties to proceedings authorized in this Article and Article X-A, "Appeals to Court," of the Pennsylvania Municipalities Planning Code, Act 247, as amended, may utilize mediation as an aid in completing such proceedings. In proceedings before the Zoning Hearing Board, in no case shall the Zoning Hearing Board initiate mediation or participate as a mediating party. Mediation

shall supplement, not replace, those procedures in this Article and Article X-A once they have been formally initiated. Nothing in this Section shall be interpreted as expanding or limiting municipal police powers or as modifying any principals of substantive law.

1808.2. Participation in mediation shall be wholly voluntary. The appropriateness of mediation shall be determined by the particulars of each case and the willingness of the parties to negotiate. Any municipality offering the mediation option shall assure that, in each case, the mediating parties, assisted by the mediator as appropriate, develop terms and conditions for:

- A. Funding mediation.
- B. Selecting a mediator who, at a minimum, shall have a working knowledge of municipal zoning and subdivision procedures and demonstrated skills in mediation.
- C. Completing mediation, including time limits for such completion.
- D. Suspending time limits otherwise authorized in this act, provided there is written consent by the mediating parties, and by an applicant or municipal decision-making body if either is not a party to the mediation.
- E. Identifying all parties and affording them the opportunity to participate.
- F. Subject to legal restraints, determining whether some or all of the mediation sessions shall be open or closed to the public.
- G. Assuring that mediated solutions are in writing and signed by the parties, and become subject to review and approval by the appropriate decision-making body pursuant to the authorized procedures set forth in the other sections of this act.

1808.3. No offers or statements made in the mediation sessions, excluding the final written mediated agreement, shall be admissible as evidence in any subsequent judicial or administrative proceedings.

1809. RELATIONSHIPS: ZONING OFFICER, ZONING HEARING BOARD, AND BOARD OF TOWNSHIP SUPERVISORS

It is the intent of this Ordinance that all questions of interpretation and enforcement shall be first presented to the Zoning Officer and that such questions shall be presented to the Zoning Hearing Board only on appeal from the determination of the Zoning Officer, and that recourse from the decisions of the Zoning Hearing Board shall be in the courts as provided by law. It is further the intent of this Ordinance that the duties of the Township Supervisors shall not include hearing and deciding questions of interpretation and enforcement that may arise.

C. All judgments, costs and reasonable attorneys fees collected for the violation of this Ordinance shall be paid over to the Township.
